Executive Summary

Orion is an integral department in Cynet's research team that works around the clock to track threat intelligence resources, analyze payloads, and automate labs to ensure that our customers are protected against the newest ransomware variants. In these monthly reports, Orion reviews the latest trends identified in [Bleeping Computer](#) – the most up-to-date website that summarizes the newest ransomware variants – and shares how Cynet detects against these threats.

The Week in Ransomware - March 25th 2022 - Critical infrastructure

With the US providing military aid to Ukraine and its sanctions damaging the Russian economy, the US government disclosed this week that there is intelligence that Russia is preparing for potential cyberattacks against US interests.

LAWRENCE ABRAMS MARCH 25, 2022 05:06 PM 0

The Week in Ransomware - March 18th 2022 - Targeting the auto industry

This week, the automotive industry has been under attack, with numerous companies exhibiting signs of breaches or ransomware activity.

LAWRENCE ABRAMS MARCH 18, 2022 04:11 PM 0

The Week in Ransomware - March 4th 2022 - The Conti Leaks

This week's biggest story is the massive data leak from the Conti ransomware operation, including over 160,000 internal messages between members and source code for the ransomware and TrickBot operation.

Cynet 360 AutoXDR™ VS Ransomware

Acepy Ransomware

- Observed since: March 2022
- Ransomware encryption method: RSA + AES.
- Ransomware extension: .acepy
- Ransomware note: ACEPY_README.txt
- Sample hash: 84BCC4AE912F0378CC5148799B33650FE358820B5F4AD8A33BDB4CEEE0D1EB1

Cynet 360 AutoXDR™ Detections:

Acepy Overview

Acepy ransomware renames the encrypted files with .acepy in the extension:

```
a.bin.acepy.acepy
a.bin.acepy
.bin.acepy.acepy
.bin.acepy
!t.bin.acepy.acepy
!t.bin.acepy
```

Once a computer's files have been encrypted and renamed, it drops a note as ACEPY_README.txt.

Upon execution, it immediately encrypts the endpoint and drops the ransomware note. The ransomware note contains the the attacker information and generic information about the encrypted files:

```
C:\Users\user\Desktop\March\March\Acepy.exe
All your files have been encrypted by the Acepy Ransomware!
All your photos, videos, music and documents have been encrypted with the extension ".acepy".
There's no way to recover them without the special key. Please contact AcepyRansom@protonmail.com to get it!
```

```
ACEPY_README.txt - Notepad
File Edit Format View Help
All your files have been encrypted by the Acepy Ransomware!
All your photos, videos, music and documents have been encrypted with the extension ".acepy".
There's no way to recover them without the special key. Please contact AcepyRansom@protonmail.com to get it!
```

Pandora Ransomware

- Observed since: March 2022
- Ransomware encryption method: RSA.
- Ransomware extension: .pandora
- Ransomware note: Restore_My_Files.txt
- Sample hash: 2C940A35025DD3847F7C954A282F65E9C2312D2ADA28686F9D1DC73D1C500224

GROUP NAME: Research

Description - Ransomware - Cynet Classification

- Associated with Ransomware type malware.
- Encrypts all of the files on the system
- Prevents access to documents and data
- Steals sensitive information.

Recommendation

- Use Cynet built-in remediation options to delete the file.
- Use Cynet built-in remediation option to disconnect the HOST from the network.
- Investigate incident according to organizations policy.
- If necessary Format the End-Point.

Pandora Overview

Pandora ransomware renames the encrypted files with .pandora in the extension, Once a computer's files have been encrypted and renamed, it drops a note as Restore_My_Files.txt.

Upon execution, it immediately encrypts the endpoint and drops the ransomware note. The ransomware note contains warnings, information, and the attacker's contact information (the ransomware couldn't run in the labs properly due to the remediation):

What happened?

!!!Your files are encrypted!!!

All your files are protected by strong encryption with RSA-2048.
 There is no public decryption software.
 We have successfully stolen your confidential document data, finances, emails, employee information, customers, research and development products...

What is the price?

The price depends on how fast you can write to us.
 After payment, we will send you the decryption tool which will decrypt all your files.

What should I do?

There is only one way to get your files back -->>Contact us, pay and get decryption software.
 If you decline payment, we will share your data files with the world.
 *You can browse your data breach here:
<http://vbfqeh5nugm6r2u2qvghsdxm3fotf5wbxb5ltv6vw77vus5frdpuaiid.onion>*
 (you should download and install TOR browser first hxxps://torproject.org)

!!!Decryption Guaranteed!!!

Free decryption As a guarantee, you can send us up to 3 free decrypted files before payment.

!!!Contact us!!!

email:
contact@pandoraxyz.xyz
 #### !!!Warning!!!

Do not attempt to decrypt your data using third-party software, this may result in permanent data loss.
 Decrypting your files with the help of a third party may result in a price increase (they charge us a fee), or you may fall victim to a scam.
 Don't try to delete programs or run antivirus tools. It won't work.
 Attempting to self-decrypt the file will result in the loss of your data.

LockBit 2.0 Ransomware

- Observed since: Mid 2021
- Ransomware encryption method: AES + RSA.
- Ransomware extension: .lockbit
- Ransomware note: Restore-My-Files.txt
- Sample hash: 9FEED0C7FA8C1D32390E1C168051267DF61F11B048EC62AA5B8E66F60E8083AF

- wb00531l.gif.lockbit

Upon execution, it immediately encrypts the endpoint and drops the ransomware note. The ransomware note contains contact information and warnings:

Restore-My-Files.txt

LOCKBIT 2.0

ALL YOUR IMPORTANT FILES ARE STOLEN AND ENCRYPTED!

Any attempts to restore your files with the third party software will be fatal for your files!
To recover your data and not to allow data leakage, it is possible only through purchase of a private key from us

There is only one way to get your files back:

Through a standard browser

- Firefox (supports Tor links) | Chrome | Opera | Edge | Safari
- Open link - <http://www.lockbit.io/>

Through a Tor Browser - recommended

- Download Tor Browser - <https://www.torproject.org/> and install it.
- Open one of links in Tor browser and follow instructions on these pages: <https://www.lockbit.io/tor-browser/> and <https://www.lockbit.io/tor-browser-2/>
- OR 113104
- <https://www.lockbit.io/tor-browser-3/>
- These links work only in the Tor browser!
- Follow the instructions on the page

ATTENTION!

- https://decoding.ai may be blocked. We recommend using a Tor browser (or Brave) to access the TOR site
- Do not rename encrypted files.
- Do not try to change using third party software. It may cause permanent data loss.
- Decryption of your files with the help of third parties may cause increased price (they add their fee to ours).
- For release contact @lockbit on social networks or contact us directly. Use <https://www.lockbit.io/> to reach Tor Browser over VPN.
- For details see channel https://t.me/lockbit_ransomware
- All your stolen important data will be loaded into our blog if you do not pay ransom.
- Our blog <https://www.lockbit.io/blog/> contains information about the companies that refused to pay ransom, where you can see data of the companies which refused to pay ransom.

BlackCat Ransomware

- Observed since: Early 2022
- Ransomware encryption method: AES + RSA
- Ransomware extension: .yicrlka
- Ransomware note: RECOVER-yicrlka-FILES.txt

BlackCat Overview

BlackCat ransomware renames the encrypted files with .yicrlka in the extension and once a computer's files have been encrypted and renamed, it drops a note as RECOVER-[variant name]-FILES.txt.

Upon execution, it immediately encrypts the endpoint and drops the ransomware note. The ransomware note contains instructions and the attacker's webpage address:

>> What happened?

Important files on your network was ENCRYPTED and now they have "yicrlka" extension. In order to recover your files you need to follow instructions below.

>> Sensitive Data

Sensitive data on your network was DOWNLOADED. If you DON'T WANT your sensitive data to be PUBLISHED you have to act quickly.

Data includes:

- Employees personal data, CVs, DL, SSN.
- Complete network map including credentials for local and remote services.
- Private financial information including: clients data, bills, budgets, annual reports, bank statements.
- Manufacturing documents including: datagrams, schemas, drawings in solidworks format
- And more...

>> CAUTION

DO NOT MODIFY ENCRYPTED FILES YOURSELF.
DO NOT USE THIRD PARTY SOFTWARE TO RESTORE YOUR DATA.
YOU MAY DAMAGE YOUR FILES, IT WILL RESULT IN PERMANENT DATA LOSS.

>> What should I do next?

1) Download and install Tor Browser from: <https://torproject.org/>

Thank you!
